

AIT Austrian Institute of Technology

Machine Vision in Austria

Andreas Vrabl

Head of Business Unit

High-Performance Image Processing

EMVA, Vienna, 16. May 2014

(Draft Version v0.2)

Overview

- Austria
- AIT Austrian Institute of Technology
- Selected Research Projects
 - Stereo Vision
 - Airport Security and Border Control
 - Surveillance and Protection
 - High Performance Vision
- Characteristics of the MV market in Austria

Austria - In the Middle of Europe

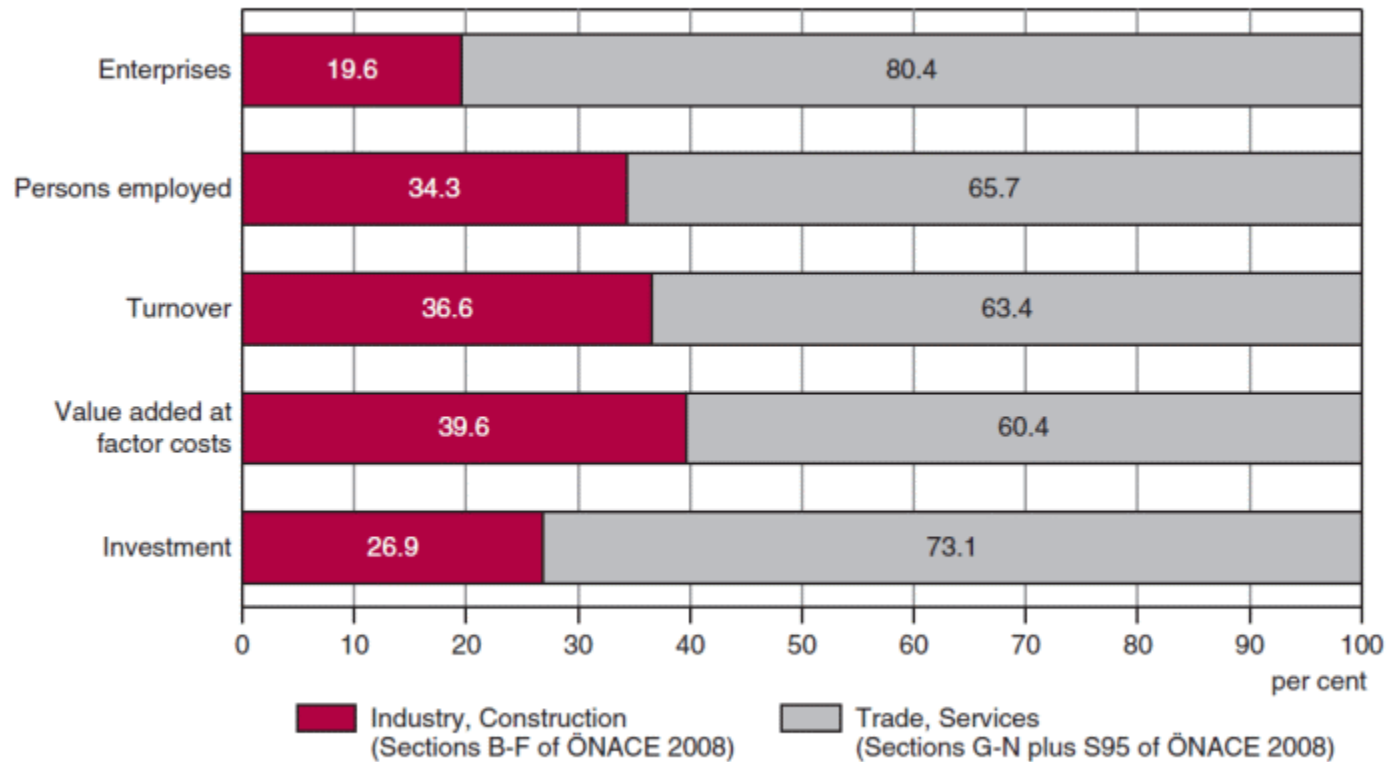

Austria - Data

Language:	German (Deutsch)
Population:	8.5 million
Area:	83 871 km ²
Largest City:	Vienna (Capital, 1.8 million, 415 km ²)
GDP per capita:	43 848 USD (31 650 EUR)
Real GDP growth:	0.9 % of GDP
GDP per capita ranking:	11th richest country world-wide (IMF 2013) 15th richest country world-wide (World Bank 2012) 2nd ranked country in EU (after Luxembourg)
Imports of goods and services:	54.0 % of GDP
Exports of goods and services:	57.2 % of GDP
Unemployment rate:	4.4 %

Data from 2012

Austria - Business

Industry, construction and trade, services 2011 in comparison

S. STATISTICS AUSTRIA, Structural Business Statistics 2011. Compiled on June 28th, 2013.

Austria - Economy

Fraction of gross value added

S: STATISTICS AUSTRIA, Eurostat.

Austria – Economic Sectors

Sections (Based on ÖNACE 2008)	Enterprises	Total persons employed 2011 (annual average)	Turnover in billion €	Value added at factor cost in billion €	Persons employed per enterprise	Value added at factor costs in € per person employed
B-F Industries and Construction	61 036	939 383	254.1	71.3	15	75 901
B-E Industries	29 463	660 595	213.6	57.0	22	86 309
B Mining and Quarrying	355	5 997	2.4	1.3	17	215 980
C Manufacturing	25 139	606 964	173.4	48.4	24	79 728
D Electricity, Gas, Steam and Air Conditioning	1 961	28 763	33.0	5.6	15	194 786
E Water Supply; Sewerage, Waste Management and Remediation Activities	2 008	18 871	4.8	1.7	9	91 409
F Construction	31 573	278 788	40.5	14.3	9	51 240

S: STATISTICS AUSTRIA, Structural Business Statistics 2011.

Sections (of ÖNACE 2008)	Enterprises	Total persons employed (annual average)	Turnover in billion €	Value added at factor cost in billion €	Persons employed per enterprise	Value added at factor costs in 1 000€ per person employed
G-N Trade and services	250 037	1 800 347	440.4	108.6	7	60
G Trade	74 765	628 922	240.6	31.0	8	49
H Transportation and storage	14 089	208 793	38.6	13.5	15	65
I Accommodation and food service activities	43 989	269 967	15.4	7.3	6	27
J Information and communication	17 207	98 552	19.5	8.3	6	84
L Real estate activities	17 862	46 236	15.5	8.2	3	177
M Professional, scientific and technical activities	60 801	215 089	26.9	12.2	4	57

S: STATISTICS AUSTRIA, Structural Business Statistics 2011.

Austria – Economic Globalization

Top 10 trade partners according to intensity of foreign trade 2012

S: STATISTICS AUSTRIA, January to December 2012.

Austria - Brands

Top 10 Austrian brands with a brand equity of 34.5 billion Euro:

SWAROVSKI

NOVOMATIC
GROUP OF COMPANIES

TELEKOM
AUSTRIA
GROUP

CASINOS AUSTRIA

Austria – Science and Technology

Gross Domestic Expenditure on R&D

S: STATISTICS AUSTRIA, Eurostat.

Overview

- Austria
- AIT Austrian Institute of Technology
- Selected Research Projects
 - Stereo Vision
 - Airport Security and Border Control
 - Surveillance and Protection
 - High Performance Vision
- Characteristics of the MV market in Austria

**Federal Ministry for Transport,
Innovation and Technology**
50,46%

**Austrian
Industry**
**Federation of Austrian
Industries**
49,54%

- ~1100 Employees
- Budget: 120 Mio €
- Business Model:
40:30:30

The Department – Human Resources – skill development

- 200+ Experts (FTE)
 - 1/3 Scientists
 - 2/3 Engineers
 - 36% PhD

Computer Science
Image Processing
Medical Computer Scientist
Electrotechnical Engineers
Physics
Mechatronik

TU Graz, TU Vienna, Uni Wien, Alpen Adria University Klagenfurt, Fachhochschulen, ISTA, etc.

- **2/3 of new employees with international education**
 - *Stanford University (USA), University of Lancaster (UK), Zhejiang University (China), Tel Aviv University (Israel), Uni Ulm, TU Berlin, FU Berlin, TU Riga (Lettland), University of Pannonia (H), University of York (UK), Slovak Technical University (Sk)*
- **IVS Research Area - Intelligent Vision Systems**
 - *Technological competence of 70+ experts (FTE)*
 - *R&D comprises the whole image processing chain: sensor, high-performance signal processing, analytics, ..., user interaction*

Bombardier Transportation New step of Safety for Tramways

BOMBARDIER
the evolution of mobility

world innovation – press conference 18.10.2013 in Vienna –
presentation of a innovative driver assistance system

Airport Security and Border Control

- **Dramatically increasing** passenger flows
 - 700 million per year today in Europe
 - +75% at airports by 2030

- Border guards face big **challenges**
 - In-depth document checks
(more than 2000 different documents)
 - Reliable identity checks
 - Check of entry conditions
 - Discover possible threats

- EU context: **Smart Border Package**
(entry-exit, registered traveller programme)

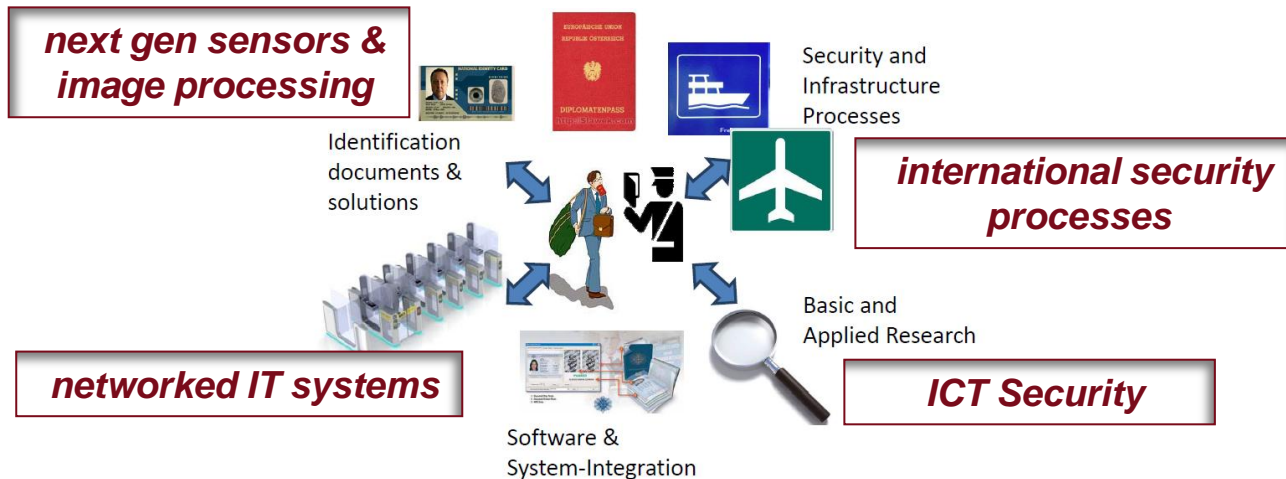

Airport Security and Border Control - Austrian Leadership by AIT initiative

- *first IP EU Security Project with Austrian coordination*

- *27 Partner, 15 Mio Euro*
- *3,5 Mio for Austria*

A harmonized, modular reference system for all European automatic border crossing points

Automated Border Control

Automated Border Control

Needs:

- Passport and biometrics verification
- Person separation
- Left item detection

Approach:

- 3D-enhanced object detection, using AIT's stereo-camera system
 - Performance-optimized stereo matching
 - WVGA resolution (608x328), depth resolution: 2 cm
- Each algorithm exploits most suitable data
 - Person separation: depth information + head-shoulder model
 - Left item detection: fusion of separate color and depth background subtraction
- Robustness of algorithm further increased by temporal integration and synchronization with the eGate's door signals

Surveillance and Protection – Increasing Challenges

*What?
When?
Where?
Who?
How?*

Example: Airport security

High Performance Vision – Worldwide Fastest Line Scan Sensor

- 600.000 lines per second monochrome, or
- 200.000 lines per second RGB color
- High light sensitivity
- Digital output 1,2 Giga-Pixel / second (10 bit)
 - a challenge for next generation image processing systems

enables a new dimension of high speed image processing applications

scanning in color @
72 km/h

with
0,1 mm
resolution

High Performance Vision – AIT Technology Leadership

Industrial Inspection & Quality Control

**Rail track
Inspection at
300km/h**

**µm-defects on
500m² polished
metal**

**40 km/h
100µm resolution**

**„European Innovation Partner“
→ unique in Europe**

High Performance Vision – Security Print Inspection

Quality Inspection of
banknotes in multiple spectral
ranges: Color, IR, UV

per second:
44 banknotes

per 8 hours shift:
1,15 Mill. banknotes

a stack of banknotes -
height of the Viennese
St. Stephen's cathedral

137 m

„Leading Technology - used world-wide“

Overview

- Austria
- AIT Austrian Institute of Technology
- Selected Research Projects
 - Stereo Vision
 - Airport Security and Border Control
 - Surveillance and Protection
 - High Performance Vision
- Characteristics of the MV market in Austria

Characteristics of the MV market in Austria

- No suppliers with a wide range portfolio of MV components
- The market is supported mainly by German and some international companies and distributors
- There are a handful established MV Integrators
- The market is very application oriented, defragmented, no big players
- Some small Austrian companies provide very specialized MV components
- Small local IT companies provide applications for local requests (SME)
- Large industry companies are establishing in-house MV competences

Characteristics of the MV market in Austria

- The main applications in industry
 - Automation engineering,
 - Quality inspection, ...
- Some non-industry applications with an international footprint
 - Traffic systems,
 - Facility management, ...
- The research in the MV market is user oriented (applied research) driven by
 - Public sector (ministry of interior, ministry of defense, ...)
 - Infrastructure operators (airports, trains, subways, highways, ...)
 - Quality inspection in production (mainly SME, some Industry)

A brand new EMVA Country and Market report will be published end of May and will provide us with more detailed information for a deeper understanding of the future opportunities in the Austrian Machine Vision market.

Thank you for listening

... and welcome to Vienna
