NEW DATES

TAKE PART IN EUROPEAN INDUSTRY EVENT
DEDICATED TO MEASUREMENT

// ANALYSIS

// CONTROL

// OPTICS

// PROCESS

// VISION

THE INTERNATIONAL TECHNOLOGICAL EVENT WILL TAKE PLACE AT **EUREXPO LYON FOR 4 DAYS**

MEASUREMENT WORLD IS:

Bringing together a range of specialists presenting technologies and solutions related to metrology and measurement thanks to the partnership with the International Metrology Congress (CIM)

A platform for exchange and sharing for all players, a place for sharing technological expertise and experience, a springboard for launching innovations and a tribune for technical partners and start-ups.

A medium for monitoring and trends to anticipate changes in companies, laboratories and organisations.

Keynote events and experiential areas which provide an opportunity to see, touch and understand innovations, promote good practices in the sector, the range of technological solutions and all the benefits of measurement.

A local approach by proposing a meeting in Lyon, a crossroads for exchanges between teaching, research and industrial production.

JOINTLY WITH GLOBAL INDUSTRIE.

An opportunity to:

- Have an even more representative panorama of the Industry
- Take advantage of an expanded technological offer, oriented towards the industry of the future
- Benefit from the entire ecosystem and user markets
- Increase the media coverage of events

**GLOBAL
INDUSTRIE**

A winning synergy that underlines the unique character of this great gathering and naturally enhances the market expertise of the visitors!

Free access between the two events

THE EXHIBITION IN FIGURES

of more than **2,200 sqm**

4 days exhibition

300 exhibitors
More than **4,000**
visitors in 2019

1 000
participants from
50 countries at the
International Metrology
Congress

MEASUREMENT WORLD AS SEEN BY EXPERTS IN THE FIELD

The Collège Français de Métrologie, organiser of the International Metrology Congress (CIM), wished to associate itself with an exhibition focusing on measurement and with an international reach. The aim is to bring together all players in the metrology sector in the same place and promote French and European technological know-how. Measurement World was created as a result of this ambition.

The first edition in 2019 was a great success and now opens the doors to the expansion of our ambition. I hereby confirm the renewed partnership of the CIM and Measurement World for an exciting 2021 edition!"

Cosimi Corleto, STIL Marposs
President of the Collège Français de Métrologie

Measurement World has become an essential exhibition for Réseau Mesure members. This event dedicated to measurement had 75 exhibitors belonging to the association in 2019 who presented their innovations in fields such as the measurement of pressure, temperature, force, humidity, speed, flows, physico-chemical analysis, etc. The joint holding of the International Metrology Congress within Measurement World guarantees the presence of targeted professional visitors from both France and abroad."

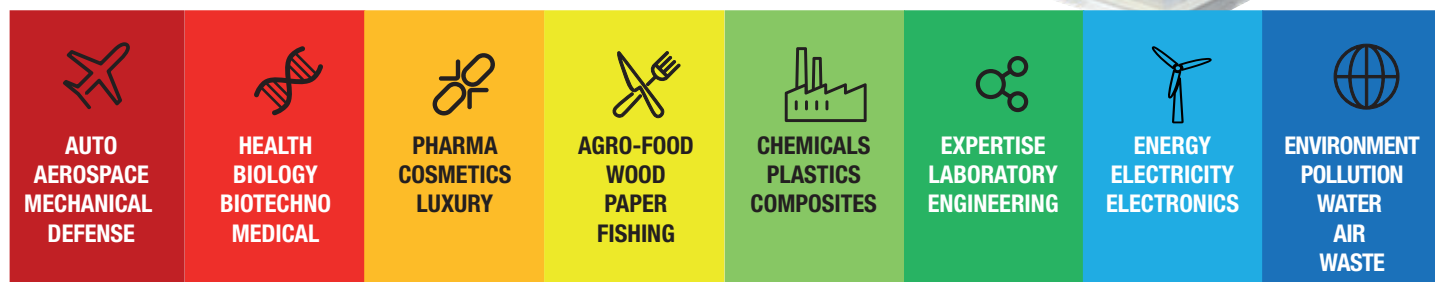

Estelle DUFLLOT,
Director of RÉSEAU MESURE

A RANGE OF SPECIALISTS

ALL INDUSTRIAL SECTORS

VILLAGE for an easy visit!

A Metrology village

Within MEASUREMENT WORLD, the Metrology Village brings together the brands and companies seeking closer contact with attendees at the International Metrology Congress (CIM 2021).

The Village is the hub of the CIM: the place where all participants gather for friendly exchanges, coffee breaks and cocktails.

The village is the heart of the Congress, an area for meetings between major companies and networking between key players in the field.

A Start'Hub village

The Start'Hub village gives you a chance to discover the start-ups who are anticipating changes in the industry of the future. These start-ups offer innovative, creative and agile solutions linked to measurement and measurement processes.

INNOVATION FOCUS

You can also highlight your latest new developments and innovations through the various digital tools which will be made available to you during the year and on the spot.

YOUR FIELDS OF APPLICATION

3D printing, Additive Manufacturing, Prototyping
Acoustics and vibration
Analysis
Anemometry
Automation and control
Certification and regulations
Chemical and biological analyses
Clean rooms
Colorimetry
Compliance with standards
Data acquisition and data processing
Data, Artificial intelligence, Data security
Development of measurement solutions
Dimensions, 3D
Extensometry
Flow and leakage
Imaging, Viewing, Vision
Instrumentation
Laboratory equipment and processes
Lasers
Maintenance
Means of calibration
Means of testing
Measurement in production
Measurement technology
Meteorological measurement
Metrology
Microscopy
Movement and position
Nanotechnologies
NDT
Optical fibre & optical connectors
Optics, photonics
Physico-chemical measurement
Processes
Pyrometry
Sensors
Software, Industrial IT
Testing and Checking
Testing and measurement
Transmitters and converters

MEASUREMENT WORLD AS SEEN BY MARKET EXPERTS

We took part in the Measurement World exhibition for the first time in 2019. During this event we appreciated the quality of the organisation and the media communication. Our location within the Start'Hub Village, next to the Metrology Village and the International Metrology Congress areas, enabled us to make interesting contacts during the demonstrations of our TX 1000 instrument for multi-element chemical characterisation. We consider that we obtained good visibility among visitors consisting of industry representatives."

Ronald BERGER LEFEBURE,
Chairman and Founder of IUMTEK, exhibitor at the Start'Hub Village in 2019

A PLATFORM FOR EXCHANGES AND SHARING FOR ALL PLAYERS IN THE MEASUREMENT FIELD

- Experts
- Laboratories
- Academics and researchers
- Manufacturers and service providers
- Institutional representatives
- Industrial users

4,000
VISITORS

in 2019 for the first edition

Campus

A meeting area dedicated to training and promoting jobs in the sector in the fields of measurement, control instrumentation and metrology, open to high school and university students.

BUSINESS MEETINGS

Prepare for your exhibition; optimise your participation and schedule meetings with new prospects. This is an opportunity to make yourself known in quick meetings which can be held on your stand or in the VIP lounge.

KEYNOTE EVENTS AND EXPERIENTIAL AREAS

CONFERENCES

Four days of open-access conferences led by the EMVA (European Machine Vision Association) and LCIE BUREAU VERITAS

In the name of the European Machine Vision Association EMVA, we wish to salute GL events for the timeliness of the new event MEASUREMENT WORLD. A partner of this new exhibition, the EMVA proposed to its members that they exhibit there. These members are satisfied and wish to register for the next edition in 2021, and our conferences were a huge success. The EMVA is convinced that the 2021 edition will once again be a success and will enable MEASUREMENT WORLD to establish itself as the leading exhibition for VISION in France."

**Michel OLLIVIER, Vice-Président,
Member of the Management Committee of the EMVA
(European Machine Vision Association)**

LCIE BUREAU VERITAS took part as an exhibitor in the new MEASUREMENT WORLD 2019 exhibition. Satisfied with the numerous contacts made over the three days of the exhibition, the test laboratory wishes to be present at the 2021 edition.

"Our conferences on the IoT and Measurement techniques: the contribution of innovation and new wireless technologies, were packed out with a very enthusiastic audience who asked numerous questions."

**Philippe SISSOKO, Director of Operations,
LCIE BUREAU VERITAS**

IN PARTNERSHIP WITH THE INTERNATIONAL METROLOGY CONGRESS (CIM 2021)

The International Metrology Congress (CIM) is an exceptional event: the only event of its kind in Europe, it allows industrial players to meet people from the R&D world. The Congress, combined with an exhibition, is an opportunity to present new technologies and provide all the information concerning technology. The event thus generates a rare wealth due to this gathering which only takes place every two years.

For 2021 the Congress continues to be driven by a strong momentum linked to advanced technologies and the tools and methods of the industry of the future. The key topics in the measurement world now concern digitalisation and data, industry 4.0 and climate change.

These themes will be present in this forthcoming edition with a clear ambition: "Share Measurement intelligence!"

Sandrine Gazal, Director of the Collège Français de Métrologie
